

## **Possible Aircraft for the First Time Flyer (2022)**

These aircraft are RTF (Ready to Fly), and include a transmitter, battery and charger. All have stabilization software built into the receiver. The stabilization software enhances the learning process and builds confidence in the first-time flyer. Repair parts are readily available.

E-Flite Apprentice STS 1.5m BNF Basic Smart Trainer with SAFE (E-flite - EFL37000)

Hobbyzone Aero Scout S 2 1.1m RTF with SAFE (HobbyZone - HBZ38000)

Hobbyzone Carbon Cub S 2 1.3m RTF with SAFE (HobbyZone - HBZ32000)

The following aircraft has been identified as a potential low cost electric trainer. In addition to the aircraft, the purchase of a transmitter, receiver, battery charger and batteries would be required. This aircraft does not come with stabilization software.

MotionRC Starling 1.23m (48.4") Wingspan - PNP from Skynetic - SKY1028-002

## **Simulator for the First Time Flyer**

For First Time Flyers who decide to participate in our training program, Love Air R/C will pay half the cost of this simulator package. This simulator requires a Spektrum transmitter. Two purchases are required to have a working simulator. These items are available from Horizon Hobby.

RealFlight Trainer Edition RC Flight Sim Software Only (RFL1205 or 1205D)

Wireless Simulator USB Dongle SPMWS2000

The Dongle plugs into your computer and becomes the wireless connection between your Spektrum Transmitter and the Simulator
